**FY 99 Funding:** \$882,892

Project Period: 9/30/99 - 8/31/04

The Child Mental Health Initiative of Northwest Indiana, targeted to up to 975 children and adolescents with SED and their families living in the area, is a family-focused, child-centered system of community-based services with governance informed by community residents themselves. It will create a seamless community infrastructure through interagency collaboration, blended funding, and wraparound and both traditional and non-traditional mental health services to serve children and adolescents with SED and their families. Significant State, regional, and local collaboration is evident in the planning and organization of the program.

Children's Mental Health Services

SM52910

Congressional District: IN-10

**FY 99 Funding:** \$980,000

Project Period: 9/30/99 - 8/31/04

The Health and Hospital Corporation of Marion County and a consortium of mental health stakeholders and family members will build on earlier consortium work to create a seamless system of care for children in the county with SED and their families. Focus populations will include former project enrollees discharged from corrections facilities; children ready to reenter the community following out-of-home placement or hospitalization; and at-risk youth who will benefit from early intervention. The local Federation of Families chapter will be integrated into the program through training and engagement.

*Indiana Federation of Families for Children's Mental Health*  
Children and Family Network  
Congressional District: IN-10

Indianapolis , IN  
SM52522

**FY 99 Funding:** \$45,836  
Project Period: 9/30/98 - 8/31/01

This project will support 9 current support groups for the families of children experiencing mental health needs, and develop an additional 21 similar groups while at the same time developing strategies for their long-term maintenance. Once developed, the Federation will train families as leaders about professional collaborations and how the effect systems change. Interested parents will be invited to represent families in systems change initiatives at the State and local levels. The Federation will collaborate with local Mental Health Associations in the 21 new group locations, suing their community skills to enhance the development of the groups. The Federation will identify technical assistance needs of families by surveying group members and people attending Federation training. After assistance needs are identified, they will be incorporated into the training agenda. This systematic approach will grow and strengthen support groups as well as give parents the opportunity to gain the skills necessary to effectively advocate for their children, even to change systems, when necessary. The project will develop family representation throughout 30 counties located in the 4 quadrants of the State, offering families resources and assistance for their children.

Mental Health State Improvement (MHSIP)  
Congressional District: IN-01

Indianapolis , IN  
SM52360

**FY 99 Funding:** \$100,000  
Project Period: 9/30/98 - 8/31/00

The primary purpose of this project is to enhance the use of consumer and service information by integrating the currently-in-place Hoosier Assurance Plan management information systems and building upon the current performance and outcomes measures utilized in the Hoosier Assurance Plan Provider Profile Report Card. Once completed, DMH envisions a managed care information system, the Provider Profile System (PPS), which contains data on consumer demographics and service effectiveness, provider information and specifications, service utilization, consumer evaluation of services received, illness prevalence data, and cost/revenue data upon which mental health and addiction service system policy decisions may be based. First year activities include analysis of the Division's data system and selection of a vendor to manage the integrated system. In the second year there will be modification of the integrated system, piloting of the system with contracted providers, provider training, continued system modification, and expansion to full implementation of the integrated Provider Profile System

State Performance Indicator Pilot

SM52514

Congressional District: IN-01

**FY 99 Funding:** \$99,820

Project Period: 9/30/98 - 8/31/01

The Indiana Family and Social Services Administration Division of Mental Health will facilitate the development and implementation of State performance indicator pilots that reflect the selected indicators in the 1997/98 Five State Feasibility Assessment Study. The secondary goal of the DMH project is to support additional pilot testing of the current performance and outcome measures used in the Hoosier Assurance Plan Provider Profile Report Card for refinement and modification. The following activities will be accomplished in the three year project: (year 1) plan for collecting and analyzing data needed to produce pilot field test, (year 2) implement and refine the field test, and (year 3) expand field test sites, establish auditing and training protocols, and implement statewide performance indicators by modifying established data collection and reporting instruments.

State Incentive Grants

Congressional District: IN-01

**FY 99 Funding:** \$2,500,000

Project Period: 7/15/99 - 7/14/02

Indianapolis , IN

SP08186

The State Incentive Grant for Iowa will "reinvent prevention in Indiana" through a three-pronged strategy: 1) the development of a comprehensive statewide prevention policy, 2) continued redirection of funding to prevent programs based upon "best practices," and 3) establishment of thirty new Grass Roots Prevention Coalitions (GPCs) to revitalize participation in prevention of substance abuse in their own neighborhoods and communities. The purpose of this effort is to reduce the use and abuse of alcohol, tobacco, and other drugs-especially marijuana-by adolescents, and to encourage the participation by parents, youth, and other private citizens in addressing substance abuse issues.

Targeted Capacity Expansion for Substance Abuse Prevention  
and HIV/AIDS

Congressional District: IN-10

**FY 99 Funding:** \$249,000

Project Period: 9/30/99 - 9/29/02

Indianapolis , IN

SP08871

Marion County of Indianapolis, Indiana will increase their capacity to provide a cohesive, integrated HIV/AIDS/STD, and substance abuse prevention and intervention program to African-American, Hispanic, Latina, and other racial and ethnic minority women aged 15 to 44. The intended outcome of this program is to decrease risk factors and increase protective factors for this population. This prevention project will offer information, skills building, individual and group level interventions, street and community outreach and a resource network of peers supported by trained technical assistants. Presentations will be tailored to the needs of each individual or group audience and will evolve from a core training curriculum that includes subjects such as substance abuse and mental health, HIV disease and other sexually transmitted diseases and related issues.
